

S&B Capital Announces Strategic Investment in NanoChronia

Munich, Germany – S&B Capital, an investment firm focused on transformative solutions for the construction, infrastructure, and energy sectors, proudly announces its investment in Barcelona-based NanoChronia. The company specializes in revolutionary nanosensor technology for real-time detection and monitoring of fugitive gas emissions.

This investment forms part of NanoChronia's larger seed round, designed to accelerate technological development in collaboration with industry partners. With the ongoing expansion of environmental regulations and the rising demand for workplace safety solutions, NanoChronia is positioning itself as the go-to provider of innovative, cost-effective sensor systems for hydrogen, methane, ammonia, and hydrogen sulphide detection.

Transforming Gas Monitoring with Nanosensor Innovation

NanoChronia's IoT-enabled nanosensor systems offer distinct advantages, including:

- Selective and sensitive detection: Differentiating between gases in real time
- Cost-effective technology: Utilizing advanced semiconductor materials
- Compact size: Leveraging nanoscale dimensions
- Longevity: Free from consumable components
- Real-time insights: Enabling immediate reporting and AI-driven data analysis

"The combination of highly sensitive nanosensors and our sophisticated control system provides companies with a tailored solution for monitoring gas emissions in real time," said Tomer Alon, CEO of NanoChronia.

Empowering Innovation Through Strategic Investment

S&B Capital's investment will enable NanoChronia to expand its team and expedite product development, reducing time to market for industries grappling with emission compliance and safety requirements.

"As S&B Capital, we seek out game-changing solutions that address real-world challenges in rapidly evolving markets. NanoChronia's breakthrough technology and visionary team exemplify these qualities," stated Patrick Seidler and Christoph Blepp, Managing Partners of S&B Capital.

About S&B Capital

Based in Munich, S&B Capital GmbH invests in innovative business models across the construction, infrastructure, and energy sectors. Founded by Patrick Seidler and Christoph Blepp, the firm aims to drive the industry's transformation for a sustainable 21st century. For more information, visit www.sandb-capital.com.

About NanoChronia

Emerging from the Mobile World Capital's Collider venture builder program, NanoChronia develops next-generation nanosensor systems for gas emission monitoring. With its unique hardware and software solutions, the company addresses critical industry challenges, enabling compliance with evolving environmental regulations. For more information, visit www.nanochronia.com.
